Click on column header to view notes.

In order to meet federal requirements of the Elementary and Secondary Education Act (ESEA), a 2013 Growth API is posted even if a school or local educational agency (LEA) had no 2012 Base API or if a school had significant population changes from 2012 to 2013. However, the presentation of growth targets and actual growth would not be appropriate and, therefore, are omitted. An LEA is a school district or county office of education.

"N/A" means a number is not applicable or not available due to missing data.

" * " means this API is calculated for a small school or LEA, defined as having between 11 and 99 valid Standardized Testing and Reporting (STAR) Program test scores included in the API. The API is asterisked if the school or LEA was small in either 2012 or 2013. APIs based on small numbers of students are less reliable and, therefore, should be carefully interpreted.

"A" means the school scored at or above the statewide performance target of 800 in 2013.

"B" means the school did not have a valid 2012 Base API and will not have any growth or target information.

"C" means the school had significant demographic changes and will not have any growth or target information.

"D" means this is either an LEA or a special education school. Target information is not applicable to LEAs or special education schools.

Targets Met - In the "Met Growth Target" columns, the growth targets reflect state accountability requirements and do not match the federal AYP requirements. The AYP requirement for the API is a 2013 Growth API of 770, or a one-point increase from the 2012 Base API to 2013 Growth API for a school or LEA.
